SENSEN by SenMetric

Just one patient who purchases hearing aids pays the entire cost! *

The image displays three screenshots of the SENSEN software interface. The left screenshot shows a 'Test Summary' with various metrics: TOTAL TIME 19.4, RESPONSE 1.0, WALKING TO LINE 8.0, TURNING 1.9, and WALKING TO CHAIR 8.5. It also includes a checklist of test results, all marked 'YES'. The middle screenshot shows a '4 Stage Balance' test with a 'Timed Up and Go' section. It features a line graph with four stages: RESPONSE TIME, WALK OUT, TURN TIME, and WALK BACK. Below the graph is a table of results for three trials. The right screenshot shows a 'STAND COUNT' of 11 and a 'FINISH TEST' button. Below this is a patient list with names like 'Born', 'Salas', 'Christopher Thomas', 'Andrews', 'Gracie Born', 'Michelle Breaker', and 'Jonathan Richards', each with an 'EDIT' and 'HISTORY' button.
